Complete Hero T-800 (Arnold Schwarzenegger) SFX Ensemble with Stan Winston-Made Head Ω

Terminator 2: Judgment Day (1991)

A complete hero T-800 (Arnold Schwarzenegger) SFX ensemble with a Stan Winston-made head from James Cameron's sci-fi action sequel Terminator 2: Judgment Day. The Terminator's clothes and synthetic skin became progressively damaged as he protected Sarah (Linda Hamilton) and John Connor (Edward Furlong) from the T-1000 (Robert Patrick), culminating in the climactic confrontation at the steel mill.

At the time of production, Terminator 2 was the most expensive film ever made, and proved a phenomenal box-office success while cementing its place as one of the greatest sequels of all time. Created by Academy Award-winning effects artist Stan Winston and his studio, the T-800's increasingly exposed endoskeleton became one of the film's defining visual effects.

This ensemble comprises a heavily distressed leather motorcycle jacket featuring white marked squares - the residue from tape - for bullet-hole SFX; a bandolier grenade belt carrying four rounds (three made of plastic and one of hard rubber); a distressed T-shirt fitted with a hard rubber endoskeleton chest piece which is embellished with painted foam sections replicating torn skin and wounds; a pair of leather SFX gloves intentionally distressed with perforations and tears revealing rubber endoskeleton appliances beneath the surface; a pair of custom-made black faux-leather trousers; and a pair of leather boots.

The T-800 head was created by Stan Winston Studio and comprises a disfigured silicone cast with faux hair formed over a metal endoskeleton skull. Its fibreglass interior houses electronics that previously illuminated the skull's eye, though they remain untested.

The ensemble is displayed on a mannequin fixed to a gridded metal panel, evoking the steel mill setting of the film's finale and creating an immersive presentation. All battle damage and distress exhibited by the ensemble was intentionally applied by production, except for some delamination to the trousers. Dimensions (costume on mannequin): 52 cm x 64 cm x 199 cm (20.5" x 25.25" x 78.25")

Contains electronics; see electronics notice in the Terms and Conditions.

Special shipping required; see special shipping notice in the Terms and Conditions.

Estimate: £60,000 - 120,000
